## Education

**M.B.A.** Iowa State University, Ames, IA (1996)

**Ph.D.** University of Illinois, Champaign-Urbana, IL (1986)  
Emphasis: Microbiology

**M.S.** University of Nebraska, Lincoln, NE (1979) Emphasis:  
Ruminant Nutrition

**B.S.** University of Nebraska, Lincoln, NE (1976) Animal  
Science and Agronomy

---

## Professional History

**July 2017-present, Director, Leopold Center for Sustainable Agriculture, Professor of Animal Science, Interdepartmental Microbiology, Iowa State University, 209 Curtiss Hall, Ames, IA 50011. [www.leopold.iastate.edu](http://www.leopold.iastate.edu)**

Manage Leopold Center operation as defined by Iowa Legislature. Develop plans for ongoing operations of the Leopold Center. Provide overall direction of program, lead and coordinate effort of the Center, establish and monitor budgets, manage and allocate resources, maintain and develop external collaborations, represent Center with University administrators, serve as spokesperson for Center, and interact with advisory board, external stakeholders, agricultural and environmental leaders and the general public. Additionally, serve as a tenured faculty member of Department of Animal Science, Interdepartmental Microbiology Program, and Sustainable Agriculture Program with research and lecture responsibilities.

**June 2012-June 2017, Director, Leopold Center for Sustainable Agriculture, Professor of Animal Science, Iowa State University, 209 Curtiss Hall, Ames, IA 50011. [www.leopold.iastate.edu](http://www.leopold.iastate.edu)**

Manage all aspects of Leopold Center operation including budget of \$2.5 million and 16 staff members. Provide overall direction of program, oversee Center grant program, lead and coordinate effort of the Center, establish and monitor budgets, manage and allocate resources, maintain and develop external collaborations, supervise personnel, represent Center with University administrators, serve as spokesperson for Center, and interact with advisory board, external stakeholders, agricultural and environmental leaders and the general public. Significant Center actions as Director include strategic plan development, completion of a review for the Iowa legislature and financial assessment and reorganization of the center. Additionally, serve as a tenured faculty member of Department of Animal Science, Interdepartmental Microbiology, and Sustainable Agriculture Program with research and lecture responsibilities.

**April 2010-May 2012. Supervisory Microbiologist, Division Director, GS 0403-15**

U.S. Food and Drug Administration, Center for Veterinary Medicine, Office of Research, **Division of Animal and Food Microbiology**, 8401 Muirkirk Road, Laurel, MD, 20708. **Technical regulatory activities:** Subject

matter expert to provide technical guidance and research support for regulatory decisions regarding drugs, feed additives and contaminants in animal feeds. Technical consultant for CVM on GAO studies concerning use of antimicrobials in livestock production. Member of Office of Foods' committee for validation of analytical methods for detection of microbial pathogens in foods and feeds. **Administrative duties:** Oversight responsibilities and supervision of the Division of Animal and Food Microbiology (25 staff members) including personnel for National Antimicrobial Resistance Monitoring System. I monitor research and laboratory activities of division, organize laboratory response to microbiological outbreaks situations and represent the Division and Center to FDA administrators, visitors and public stakeholders. Serve as member of senior management team for Office of Research (100 staff members) with a budget ~\$5.5 million.

**March 2009-May 2012. Research Microbiologist, GS 0403-15**

U.S. Food and Drug Administration, Center for Veterinary Medicine, Office of Research, Division of Animal and Food Microbiology, 8401 Muirkirk Road, Laurel, MD, 20708. Duties: **Plan and conduct research** designed to determine the presence of microbial pathogens and antimicrobial susceptibility profile of bacteria present in animal feeds and feed ingredients. Develop new research approaches for investigating pathogens found in animal feeds and in animal production environments. Develop and investigate procedures and practices for control of antimicrobial resistance in bacteria. Investigate: 1) Factors related to the presence of antimicrobial residues in distillers grains and 2) Use of efflux pump inhibitors from plants to reverse antimicrobial resistance in bacteria.

**2006-2009: SarTec Corp. and Ever Cat Fuels, LLC, Anoka, MN.** Recruited to an entrepreneurial opportunity in the agriculture and biofuels industries. Duties: 1) **Team Leader:** development of methods for cultivation of algae to fix carbon dioxide from the flue gas of coal fired electrical generating plants, 2) Member of a development team for biofuels and energy development project using transition metal oxide catalysts for continuous-flow biodiesel production, 3) **Project manager** of animal nutrition research related to use of biofuel co-products, 4) Evaluation of market opportunities for new nutritional products for cattle industry. Responsibilities: Develop new research and product initiatives. Organize research effort with internal scientific staff and external collaborators. Obtain external funding for corporate projects from federal SBIR, USDA Rural Development Programs and corporate investment partners. Serve as technical advisor to administrative and marketing staff. Train undergraduate students from Augsburg College in research protocols and procedures.

**2002-2006: Research Leader, GS 0403-15**

**Pre-Harvest Food Safety and Enteric Disease Unit, USDA, ARS, National Animal Disease Center, Ames, IA**  
**Supervisor and manager** of a research unit with a \$4.5 million research budget and 40 employees. The unit's food safety research consisted of projects on *E. coli*, *Salmonella*, competitive exclusion, antibiotic resistance, *Campylobacter*, plant toxins and gut microbiology/ecology. Responsibilities: **Lead and coordinate research** effort of unit, establish and monitor research budgets, **manage and allocate** research facilities, monitor external collaborations and contracts, supervise personnel, spokesperson for unit, interact with stakeholders and USDA officials. **Large research organization management and administrative duties:** Research Leader's served as members of **NADC Senior Management Team**. Additional service: NADC microbial agent inventory committee, USDA Ames Combined Support Services Plan, Ames Area A76 outside contracting committee and **evaluation panel for ARS Research Promotion and Evaluation System, 1999-2006.**

**2000-2006: Lead Scientist/Microbiologist, GS 0403-14,15**

**USDA, ARS, National Animal Disease Center, Ames, IA**

Direct food safety and animal health research projects: 1) Investigate **rumen protozoa as reservoirs** of bacterial pathogens and identify methods for rumen defaunation using plant extracts. Demonstrate proof of concept and present research results to other researchers and to industry. 2) Nutritional evaluation of plant secondary compounds. Effect of furan fatty acids on chickens. 3) **Subacute rumen acidosis in dairy cattle;** diagnosis, treatment and prevention using probiotic bacterial cultures of *Prevotella*. Established collaboration with Iowa State University and Agri-Food Canada to test efficacy in dairy cattle.

**1996-2006: Lead Scientist/Microbiologist, GS 0403-13,14,15**

**USDA, ARS, National Animal Disease Center, Ames, IA Entrepreneurship in Food Safety Technology:**

Discovery, development and **commercialization** of an optical instrument technology based upon chlorophyll

metabolites in the GI tract useful for the real-time detection of fecal contamination on animal carcasses. Member of a three-person joint USDA and ISU discovery team. Responsibilities: Research and development, coordination of government, academic and industry development effort, pursuit of patent rights, technology transfer to private industry. Results: Patent issued 1999, prototype instruments assembled, and feasibility demonstrated to over 75 industry contacts, technology reviewed by numerous industry and public media outlets, technology transferred through license and research agreement to competitively selected firm for commercial development. Technology in use by domestic and international meat processing firms under the trade name VerifEYE™. Technology named as best practice for meat processing industry. This imaging technology was recognized in 2012 by **Iowa State as ranking 14<sup>th</sup> in lifetime earnings** generated for the university as a result of technology transfer activities.

**1992-2006: Faculty, Collaborator status, Iowa State University, Department of Animal Science and Department of Biomedical Sciences, College of Veterinary Medicine.**

Duties: **Lecturer in charge**, Animal Science/Microbiology 610, Microbiology of the Digestive Tract, 1992 to 1998. Lecturer for Animal Science 519, Ruminant Digestive Physiology, 2000-2006. Member of Graduate Faculty 1995-2006, 2012-present.

**1993-1996: Research Scientist/Microbiologist, GS 0403-13  
USDA, ARS, National Animal Disease Center, Ames, IA**

Food Safety Research: **Ecology of *Escherichia coli* 0157:H7 in cattle**. Responsibilities: **Conduct and coordinate research**; establish research agreements with universities and industry; supervise students, postdoctoral associates, technicians, and summer interns; communicate research results. Results: Demonstrated that pre-slaughter feeding management can influence the microbiology of the GI tract. Dietary stress can increase the potential for pathogenic *E. coli* to establish in the gut which in turn can alter the risk of food-borne pathogen contamination of carcasses during processing. Results widely cited and considered influential to others in the field.

**1995: Research Leader, USDA, ARS, National Animal Disease Center, Physiopathology Unit, Ames, IA**

Due to a retirement, assigned to a rotating, temporary position as supervisor of research unit with a \$2.9 million research budget and 40 employees. Responsibilities: Coordinate research programs, monitor budgets, communicate unit research to internal and external stakeholders.

**1988-1993: Microbiologist, USDA, ARS, National Animal Disease Center, Ames, IA**

Research: Rumen metabolism of plant toxins. Responsibilities: Laboratory and animal research, laboratory personnel supervision, data analysis, and communication of research results. Results: 1) Identification of microbes responsible for selenium metabolism in the rumen. 2) Description of rumen microbial metabolism of lathyrogenic, non-protein amino acids contained in *Lathyrus sylvestris* (flatpea) in collaboration with ARS West Virginia laboratory, Beaver, WV. 3) Investigation of rumen degradation of fescue alkaloids in collaboration with Virginia Tech, Blacksburg, VA.

**1986-1988: Research Scientist, Eastman Chemical Company, Eastman Kodak, Kingsport, TN**

Research Duties: Discovery research in various aspects of animal nutrition and microbiology with an emphasis on cellulose digestion and fermentation. Responsibilities: Project manager, personnel supervision, research planning and coordination, data analysis and technical consultant to the marketing staff. Project successes: 1. Development of cellulose derivatives which disrupt microbial digestion of cellulose in the termite gut and thus provide an environmentally safe means of termite control. 2. Investigate production of kojic acid through fermentation for use as an intermediate feedstock in chemical synthesis. Biological research division eliminated by corporate restructuring, 1988.

**1979-1981: Self-employed in production agriculture, Nebraska**

Production and financial management of beef cattle (feedlot & brood cows), grain, and forage enterprises (~\$750,000 gross sales annually) on family farm near Hubbard, Nebraska.

**1976-1977: Adjunct Faculty, Western Iowa Technical Community College, Sioux City, IA**

Courses taught: Soils and Fertilizer Technology.

---

### Selected Personal Invitations/Technical Research Presentations (since 2005)

- Blog: It's a Matter of Trust. Iowa Learning Farms, Iowa State University, 9/2020.  
<https://iowalearningfarms.wordpress.com/2020/09/17/its-a-matter-of-trust/>
- Invited panelist: Agriculture and Climate. **Midwest Climate Summit**, Washington University, St. Louis, MO, 11/6/20.
- Invited presentation: Grassland, Climate and Cattle: Its Complicated. **Green Lands and Blue Water**, Minneapolis, MN, 11/19/19.
- Invited presentation: Livestock and Sustainable Agriculture. Future of Agriculture Conference, Whiterock Conservancy, Coon Rapids, IA, 11/14/19.
- Invited podcast: Cattle, Climate and Methane, Iowa Beef Center, 8/2019.
- Invited panelist: Improving post-mortem inspection of beef for human health. **Inter. Assn. Food Protection**, Louisville, KY, 7/24/19.
- Invited presentation: "Ruminants and grazing", **Stone Barns Center for Food and Agriculture**, Pocantico Hills, NY, 7/18/2019.
- Invited webinar: Are cattle really wrecking the planet? Iowa Learning Farms, Ames, IA, 3/20/2019.
- Invited presentation: Muddy Waters: The continuing story of the Leopold Center. Leopold and Agriculture Conference, Burlington, IA, 3/16/2019.
- Invited presentation: Climate Agriculture and Carbon. Ames Garden Club, Ames, IA, 2/21/19.
- Numerous interviews to radio, newspaper and magazine outlets as well as presentations before civic, agricultural and business organizations on the programs and activities of the Leopold Center. Throughout Iowa, 2012-present.
- Leopold Center quarterly newsletter: Conversations with the Director. Select recent titles: Is absentee farmland ownership a bad thing; An inconvenient landscape; When used according to label directions; Greening up what we eat; Can independent farmers survive; Erosion; For the Greater Good. [www.leopold.iastate.edu](http://www.leopold.iastate.edu), 2012 to present.
- Invited presentation: Role of livestock in conservation systems. Sustaining our Iowa Land, Drake University, Des Moines, IA, 11/19/2015.
- Invited presentation: Agricultural sustainability: Some issues to consider. **DuPont Sustainability Committee**, Ames IA, 8/20/2015.
- Invited presentation: The challenges of sustainable agriculture in the corn-belt. **Philadelphia Society for Promoting Agriculture**, Philadelphia, PA, 6/4/2015.
- Invited presentation: Agricultural sustainability: Start with the soil. **Tuskegee University**, Tuskegee, AL, 4/8/2015.
- Seminar: GMOs the saga continues. Graduate Program in Sustainable Agriculture, Iowa State University, Ames, 1/14/2015.
- Invited presentation: The challenges of sustainable agriculture. Osher Lifelong Learning Institute, Ames, IA, 10/8/2014.
- Invited presentation: A Leopold Center summary on agriculture. **U.S. State Department**, Ames, IA, 8/21/2014.
- Invited presentation: Alternative agriculture and the Leopold Center. Young Professionals in Agriculture, Des Moines, IA, 2/11/2014.
- Invited presentation: Food Safety and FSMA. Stone Barns Board of Directors, Tarrytown, NY, 9/16/2013.
- Invited presentation: Alternative and sustainable agriculture. USDA/NCAUR, Peoria, IL, 8/22/2013.
- Invited presentation: Historical perspectives on microbial ecology and NADC's enteric disease research, 1st International NADC Animal Health and Food Safety Research Symposium, Ames, IA 11/9/2011.
- Presentation: OR/CVM distillers grains antimicrobial residue research update. Ann. Meet. CVM Field Committee, Rockville, MD 3/3/2011.

- Presentation: Antimicrobial resistance: Plant secondary compounds as efflux pump inhibitors. Amer. Registry of Prof. Anim. Sci., Beltsville, MD, 9/15/2010.
- Presentation: Research update, OR feeds microbiology program. Ann. Meet. CVM Field Committee, Bethesda, MD, 3/4/2010.
- Invited presentation: Microbial aspects of feeding livestock. **Center for Veterinary Medicine/FDA**, Laurel, MD, 12/12/2008.
- **Interview, WCCO Radio** with Don Shelby, Minneapolis, MN, “Biodiesel production using algae”. 10/29/2008.
- Invited presentation: A novel continuous catalytic system for biodiesel production from algae. National Algae Association Meeting, The Woodlands, TX, 7/17/2008.
- Invited presentation: Research, innovation and opportunity in a bio-based economy. **Oregon State University**, Corvallis, OR, 7/11/2008.
- Invited presentation: A rumen full of research. University of Vermont, Burlington, VT, 5/8/2008.
- Invited presentation: Carbon dioxide management through algae cultivation. Biosciences Regional Conference, Minnesota West Community and Technical College, Worthington, MN, 3/28/2008.
- Invited presentation: An inside view of rumen protozoa. Department of Microbiology, South Dakota State University, Brookings, SD, 2/29/2008.
- Invited presentation: Food safety research: A view from within the animal. School of Veterinary Medicine, **University of California**, Davis, CA, 11/29/2007.
- Invited presentation: Cultivation of algae for fixation of carbon dioxide. **Minnesota Society of Professional Engineers**. Minneapolis, MN, 11/6/2007.
- Presentation: Carbon dioxide fixation at coal fired electrical generating plants using photosynthetic microbes. **Great River Energy**, Elk River, MN, 10/24/2007.
- Presentation: Research progress in rumen microbiology and physiology. Novus International, Inc. St. Charles, MO, 10/3/2007.
- Presentation: Progress in ruminant nutritional research. **Land O Lakes Purina**, LongView Animal Nutrition Center, Gray Summit, MO, 9/17/2007.
- Presentation: Cultivation of algae for carbon dioxide fixation and production of lipid feedstocks for biodiesel. **Xcel Energy**, Minneapolis, MN, 6/27/2007.
- Presentation: So just what goes on in the rumen? SarTec feedlot manager seminar, Las Vegas, NV, 12/5/2006.
- Invited presentation: Agricultural production, research and technology transfer. Department of Animal Science, **South Dakota State University**, Brookings, SD, 4/20/2006.
- Invited presentation: Rumen microbiology research at the National Animal Disease Center. Beef Day, Colorado Farm Show, Greeley, CO, 1/25/2006.
- Invited presentation: Control of pathogens using rumen defaunation. **Rushmore Conference on Enteric Diseases**, Rapid City, SD, 9/29/2005.
- Invited presentation: Rumen protozoa: A view from within. Iowa Feed and Nutrition Conference, Ames, IA, 4/5/2005.
- Invited presentation: Control of acidosis with *Prevotella*, Department of Animal Science, The Ohio State University, Wooster, OH, 6/30/2005.

---

## Recent Academic and Other Service

- Book reviewer: Columbia University Press. Sustainable Food Production: A Primer for the Twenty-First Century, authors Naeem, S., van Huysen, T., and Lipon, S., 2019.
- Serve as advisory board member for Midwest Grape and Wine Industry Institute, Iowa State University, 2012–present.
- Iowa State University Sustainability Committee, 2019-present.
- Faculty Advisor, ISU Iowa Learning Farms, 2018-present.
- Mentor, ISU Honors Student, Grace German, Animal Science, 2019.

- Mentor, ISU Honors Student, Jazlyn Beeck, Geology, 2019.
- **Deans Citation for Extraordinary Contributions**, College of Agriculture and Life Sciences, Iowa State University, March 2018.
- Co-instructor for Animal Science 520, Digestive Physiology and Metabolism of Ruminants, Spring 2018, Iowa State University.
- **Graduate student advisor**, Jasmine Carroll, MS graduate student in microbiology. Project: Prevalence of APEC and antibiotic resistance of *E. coli* in poultry, 2015-2017. Iowa State University.
- Panel member, Postdoctoral Scholars' Professional Development Workshop, September 2015, Iowa State University.
- Co-instructor for Animal Science 603, Animal Nutrition Seminar, Fall 2015, Iowa State University.
- **Reviewer for Institute of Medicine** and National Research Council, A framework for assessing effects of the food system. Washington DC, 2015.
- Host and meeting organizer, DuPont Sustainability Committee, Ames, IA, 2015.
- Evaluator, Global Youth Institute, The World Food Prize, Des Moines, IA, 2014.
- Guest lecturer, University of Northern Iowa, Geog. 3220, Environmental Geography, Cedar Falls, IA, 2014.
- Teaching at Iowa State University, V MPM 525. Intestinal Microbiology and Anim. Sci. 520 Rumen Microbiology, Ames, IA, 2014.
- **Grant Reviewer, Minnesota Environment and Natural Resources Trust Fund, 2013.**
- External Evaluator, Faculty Tenure and Promotion, Department of Animal Sciences, The Ohio State University, Columbus, 2011.
- Lecturer, Gut Microbiology, Department of Animal Science, University of Maryland, College Park, MD, 2011.
- USDA/NIFA grant review panel service. Washington DC 2010.
- **FDA/CVM Master Regulatory Reviewer** promotion panel, 2010 - 2012.
- Undergraduate student advisor and supervisor, Augsburg College, Minneapolis, MN. Microbiological and algae culture projects. 2006-2009.
- **Graduate student advisor** and POS committee member, Department of Biomedical Sciences, Department of Food Science and Human Nutrition, Department of Animal Science, Interdepartmental programs in Toxicology and Microbiology, Iowa State University, 1992-2006. Various research projects for 18 students.
- **RPES** Panel service for the ARS, Research Promotion and Evaluation System, 1999-2006.
- **Professional Memberships**: American Society for Microbiology, Society for Industrial Microbiology, Nutritional Science Council, Sigma Xi.
- **President**, North Central Branch, American Society for Microbiology, 1998-2000; 2004-2005.
- Chair, organizing committee for annual meeting, North Central Branch-American Society for Microbiology, 1999 and 2005.

---

## University Teaching

2020: Animal Science 603, Graduate Animal Nutrition Seminar, Iowa State University, Fall Semester, with Dr. Dawn Koltcs.

2020: Animal Science 520, Digestive Physiology and Metabolism of Ruminants, Iowa State University, Spring Semester, Dr. Ranga Appuhamy.

2019: Guest panelist, Career Planning, U St 275x, Iowa State University, Fall Semester, Dr. Svitlana Zbarska.

2019: Guest Lecturer, "Shedding Some Light on Food Safety: An Entrepreneurial Tale, Food Science Human Nutrition 489, Iowa State University, Spring Semester, Dr. Lakshman Rajagopal.

2018: Animal Science 520, Digestive Physiology and Metabolism of Ruminants, Iowa State University, Spring Semester, Dr. Ranga Appuhamy.

2016: Guest Lecturer, Climate and Soil Carbonate, Chemical Engineering 430, Process and Plant Design, Iowa State University, Spring Semester, Dr. Cory Stiehl.

2015: Microbiology 604, Graduate Student Seminar. Iowa State University, Spring Semester. Dr. Laura Jarboe.

2015: Animal Science 603, Graduate Animal Nutrition Seminar. Iowa State University, Fall Semester. With Dr. James Russell.

2014: Animal Science 520, Digestive Physiology and Metabolism of Ruminants, and Veterinary Microbiology 525X, Intestinal Microbiology. Iowa State University. Spring Semester. Dr. James Russell and Dr. Nancy Cornick.

2011: Animal Science 340, Animal Health Management, Introduction to Gut Microbiology. University of Maryland. Spring semester. Dr. Sarah Balcom.

2000-2006: Animal Science 519, Digestive Physiology of Ruminants, Rumen Microbiology. Iowa State University. Spring semester. Dr. Allen Trenkle and Dr. James Russell.

2002-2005: Lecturer, Sociology 541, Agricultural Technological Innovation, Social Change and Development. Iowa State University. Fall semester. Dr. Robert Mazur.

1991-1998: Animal Science 610, Microbiology of the Digestive Tract. Iowa State University. Fall semester.

---

### Select Research Funding Activity (all grants total, ~\$3,480,000)

- Preventing the destruction of 6 billion animals annually using non-invasive *in ovo* sex detection in fertile layer eggs. 2019. With S. Lamont and J. Petrich, J. USDA NIFA, **\$500,000**.
  - Validation of fluorescence analysis of grass-fed milk. 2017. With L. Peterman and J. Petrich. CROPP/FAFO, **\$42,000**.
  - Rapid and comprehensive detection of antimicrobial resistance in bacterial pathogens. 2011. With R. Roberts et al. FDA Medical Countermeasures Initiative, **\$644,000**.
  - Ultrafast continuous biodiesel production from multiple feedstocks using fixed bed reactors and metal oxide catalysts. 2009. For SarTec Corp. USDA SBIR, Phase II Contract, **\$350,000**.
  - A novel system for the sequestration and conversion of carbon dioxide to useful products using stable metal oxide catalysts. 2009. For SarTec Corp. DOE SBIR, Phase I Contract, **\$100,000**.
  - Continuous biodiesel production from multiple source feedstocks using zirconia catalyst. 2008. For SarTec Corp. USDA SBIR, Phase I Contract, **\$80,000**.
  - Flue gas CO<sub>2</sub> capture with rapid growth algae to produce renewable fuel. 2008. With Clayton McNeff and Arlin Gyberg. Xcel Energy Contract, Renewable Development Fund, **\$350,000**.
  - Algae culture systems and CO<sub>2</sub> fixation from power plant emissions. 2007. With Clayton McNeff and Arlin Gyberg. Great River Energy Contract, Renewable Energy Fund, **\$180,000**.
  - Elimination of pathogens from livestock using a combination of Yucca saponins and sodium chlorate. 2006. With C. McNeff and R. Anderson. USDA SBIR, **\$80,000**.
-

## Technical Reports and Patents

- McNeff, L., McNeff, C., Greuel, P., **Rasmussen, M.**, and Franklin, S. Compositions and methods for mitigating dietary sulfur in animals. U.S. Patent 9826761, 11/28/2017.
- McNeff, L., McNeff, C., Greuel, P., **Rasmussen, M.**, and Franklin, S. Compositions and methods for mitigating dietary sulfur in animals. IP Australia Patent 2009298189, 11/5/2015.
- McNeff, L., McNeff, C., Greuel, P., **Rasmussen, M.**, and Franklin, S. Composiciones y metodos para reducir el azufre dietetico en animals. IMPI Mexican Patent 330006, 5/12/2015.

- Rasmussen, M.** An accumulation of environmental consequences. Center for Strategic and International Studies (<http://csis.org/blog/accumulation-environmental-consequences>), 7/31/2014.
- Rasmussen, M.,** McNeff, C., and McNeff, L. Algae cultivation systems and methods. U.S. Patent 8033047, 10/11/2011
- Casey, T. A., **Rasmussen, M. A.,** Gapsch, A. H., Flick, R. L., and Petrich, J. W. Real-time monitoring of age pigments and factors relating to transmissible spongiform encephalopathies and apparatus. United States Patent Application 20100159505. 2010.
- Weimer, P., Cotta, M., and **Rasmussen, M.** "In memoriam: James B. Russell, Ph.D.". J. Anim. Sci. 88:815-816. 2010.
- Cotta, M., **Rasmussen, M.,** and Weimer, P. In memoriam: James Russell. Microbe 5:85-86. 2010.
- Rasmussen, M.A.** Systems and methods for increasing lipid synthesis in algae. United States Patent Application 61/084,484, 2010.
- McNeff, L., McNeff, C., Greuel, P., **Rasmussen, M.** and Franklin, S. Compositions and methods for mitigating dietary sulfur in animals. United States Patent Application 20100173040, 2010.
- Chiquette, J., Allison, M.J. and **Rasmussen, M.A.** Use of *Prevotella bryantii* 25A as a probiotic to reduce the risk of ruminal acidosis in dairy cows. ISU Animal Industry Report ASL-R2301. 2008.
- Rasmussen, M. A.** Nutritional considerations with the feeding of partially defatted distillers grains. SarTec Technical Report. 2008.
- Rasmussen, M.A.,** McNeff, L. and McNeff, C. Algae cultivation systems and methods. United States Patent Application 20090126265, 2009.
- Rasmussen, M. A.** The importance of maintaining normal rumen function in cattle. SarTec Technical Report. 2007.
- Rasmussen, M. A.** No protozoa in grain-fed cattle? A realistic look at the data. SarTec Technical Report. 2007.
- Rodriguez, F., **Rasmussen, M. A.,** and Allison, M. J. Discovery of a probiotic to reduce the risk of lactic acidosis in cattle. ISU Animal Industry Report ASL-R2194. 2007.
- Rasmussen, M. A.** The effects of defaunation of the rumen on growth, intake and digestion in ruminants. SarTec Technical Report. 2006.
- Cutler, S., **Rasmussen, M. A.,** and Scanes, C. *Salmonella* colonization and microbial fermentation in the turkey crop. FeedInfo News Service. 2006.
- Casey, T., **Rasmussen, M.,** and Petrich, J. Method and system for detecting fecal and ingesta contamination on the carcasses of meat animals. U.S. Patent 5914247, 1999.
- Rasmussen, M.** Use of rumen contents from slaughter cattle for the production of lactic acid. U.S. Patent 5459053, 1995.
